Rapid Precision Contouring of 3-D Objects

Christopher Ditchman
Nicholas George

Objectives

- Measure the 3-dimensional surface profile of an object using the projection of structured illumination
- Explore theoretical system resolution limits
- Implement sub-system improvement
  - Illumination / measurement
  - Data processing
  - Data display

Approach

- Achromatic Phase Shifter (George and Stone, 1988)
- Multiple Wavelength Imaging
- External Laser Stabilization
- Improved Processing Algorithms

March 2002
